Subject: Urgent Request to Address Water Contamination Issue Posing High Risk to Public Health in Orathanadu Taluk, Thanjavur

Respected Sir/Madam,

I am writing to bring to your immediate attention a critical issue regarding the water supply in Kothangudi village, under Orathanadu Taluk, Thanjavur District. It has come to the notice of the residents that the water being supplied is severely contaminated, resulting in a foul odor, discoloration, and reported illnesses among the public.

Over the past few weeks, there has been a significant increase in water-borne diseases such as diarrhea, skin infections, and fever cases in our locality. Upon preliminary observation, it is suspected that the contamination may be due to leakage in underground pipelines or mixing of sewage with drinking water lines.

This situation poses a **serious risk to the health and safety of the residents**, especially children and the elderly. If not resolved promptly, it could lead to a widespread outbreak and endanger hundreds of lives.

We, therefore, request your department to:

1. Conduct an **urgent inspection** of the water supply system in the affected area.
2. Arrange for **safe drinking water** supply through tankers until the issue is resolved.
3. Take **immediate remedial action** to fix the source of contamination.
4. Test and monitor the water quality regularly to avoid future incidents.

We hope for your swift action in resolving this issue to prevent any further health hazards.

Thanking you.

Yours sincerely,
S. Rajesh
