The Executive Engineer,
Public Works Department (Water Supply),
Tambaram Taluk,
Chengalpattu District,
Tamil Nadu.

Subject: Request for Immediate Action on Drinking Water Contamination Issue

Respected Sir/Madam,

I am writing this letter to bring to your kind attention the severe issue of contaminated drinking water being supplied in our locality under Tambaram Taluk.

For the past few weeks, the water being supplied has a foul smell and is yellowish in color. Several residents in our area have reported health issues such as stomach infections and skin irritations after consuming this water. This problem is especially concerning for children and elderly residents.

Key issues observed:

- Foul smell and discoloration in drinking water
- Presence of suspended particles and mud
- Unpleasant taste making it unfit for consumption
- Increased cases of waterborne diseases

We kindly request the following actions from your department:

- Immediate testing of the water quality in our locality
- Identifying and repairing any leakages or pipe contamination
- Arranging for alternate clean drinking water supply (e.g., water tankers) until the issue is resolved
- Regular maintenance and flushing of pipelines in our area

We sincerely request your urgent intervention in this matter to ensure the health and safety of all residents.

Thanking you in advance for your prompt action.

Yours faithfully,

[Your Name]
